TO HEALTHCARE PROVIDERS

This Coding Resource includes the MS-DRGs and commonly billed procedure codes for selected cardiac surgery procedures. This is not a comprehensive list of all available codes, and it is possible that there is a more appropriate code for any given procedure.

Reimbursement information provided by Medtronic is for illustrative purposes only and does not constitute legal advice. A Few Notes About Coding Systems and Medicare Payment Methodologies ICD-10

ICD-10-CM for diagnosis coding and ICD-10 PCS for inpatient procedure coding became effective October 01, 2015. The new code set replaces the previous ICD-9 coding system. This change does not impact CPT coding for physician and hospital outpatient services. While physician and outpatient

procedures will continue to use CPT coding to report procedures, diagnosis coding will be reported using ICD-10 CM. For more information, please visit the Medicare ICD-10 website at: cms.gov/Medicare/Coding/ICD10/index.html

Hospital Inpatient ICD-10 Procedure Coding and Reimbursement

Hospitals assign ICD-10 codes for both diagnoses and procedures for inpatient admissions. For Medicare, inpatient hospital reimbursement is under the Medicare Severity Diagnosis Related Groups (MS-DRG) system. For each admission, the ICD-10 diagnosis and procedure codes are grouped into one of over 750 MS-DRGs. Regardless of the number of codes, only one MS-DRG is assigned to the admission. Each MS-DRG has a unique relative weight, which is then converted into the payment amount. Medicare has used the DRG system for hospital inpatient reimbursement since 1983.

Physician CPT® Coding and Reimbursement

Physicians use ICD-10 CM codes for diagnoses and CPT codes for procedures, regardless of whether the setting is inpatient or outpatient. The ICD-10 CM diagnosis codes are used for claims adjudication. However, for determining Medicare payment, only the CPT procedure codes are used. For Medicare, physician reimbursement is under the RBRVS system. Each CPT code is assigned a unique relative value unit, which is then converted into the payment amount. Medicare has used RBRVS for physician reimbursement since 1992.

C Codes

C codes do not apply to inpatient surgical procedures such as CABG or valve replacement procedures. C codes are used in conjunction with the Medicare prospective payment system for outpatient procedures (APCs).

Medicare Severity Diagnosis Related Groups (MS-DRGs)

Conceptual Framework

Medicare Severity Diagnosis Related Groups (MS-DRGs) are a significant modification to the prior DRG system, but not a radical one. They retain many of the refinements suggested by users over the year while updating other features. The purpose of the MS-DRGs is to “better recognize severity of illness and resource use based on case complexity.” The MS-DRG system was effective on October 1, 2007.

Core Changes

The number of DRGs has increased from 538 to over 750 MS-DRGs. There is an addition of severity classification, as illustrated below:

- W MCC (with major complication and comorbidity) over 3,000 listed in the Fed. Register
- W CC (with complication and comorbidity) over 14,000 listed in the Fed. Register
- WO CC/MCC (without complication and comorbidity/major complication and comorbidity)

Severity Classifications

As designed, severity and weight increase with each tier. Which severity is assigned depends on each case's secondary diagnosis codes. Regardless of how many secondary diagnoses are present, only one MCC or CC code is needed for the entire case to be assigned to a particular DRG. CMS maintains the list of all ICD-10 CM Codes designated as MCC/CC on their website.

Hospital ICD-10 PCS Potential Codes

Note: The ICD-10 PCS codes shown are those that reflect the typical procedure, using known Medtronic devices where appropriate. Theoretical possibilities are not shown, e.g., approaches that are not common, device types that are not currently on the market. The general equivalence between ICD-9 procedure codes and ICD-10 PCS codes shown here is for illustrative purposes. Please refer to clinical documentation for appropriate ICD-10 PCS code selection.
